

Kunststoff GmbH

**Tank, plant and pipeline construction
wastewater technology and pollution control
systems**

Your competent partner for:

- tank and pipe construction
- wastewater treatment plants
- extraction systems for acid or alkaline fumes
- industrial assembly
- protective tube renovations for lifts
- customized process equipment

We get thermoplastics into shape!

Mission:

To realize your order with you in the best possible way, on time and cost effectively
We provide the best solutions available in the market for thermoplastics.

Vision:

To become your preferred supplier for thermoplastic systems and container construction.
We want to establish our presence in the market and consolidate our position.

Quality Policy:

Exceed customer expectations.
We safeguard customer satisfaction in order to encourage loyalty and a long-term successful cooperation

Fax: +49 60 22 - 65 41 40
email: info@msk-kunststoff.de
web: www.msk-kunststoff.de

Our delivery program includes:

- plastic sheets and moldings
- plastic pipes and fittings
- pumps, mixers and technical accessories for aggressive fluids
- customized components according to your individual wishes and dimensions
- manual and automatic valves

Made of PE, PP, PVC, PVDF and PMMA

MSK

Your reliable Partner for plastic trading, -manufacturing and -assembling!

The company

- Since 1990 competent supplier for the chemical and electroplating industry
- Expert in: Processing of thermoplastics (PP, PE, PVC, PVDF)

Ventilation technology

- exhaust air purification systems to reduce gaseous emissions
- droplet adsorber
- pipe and duct silencer
- suction hoods and boxes
- fans
- condensation separators
- surface evaporative plants
- deflector hoods
- plastic channel and fittings for individual needs

Plant construction:

We plan, manufacture and assemble sewage and processtechnical plants for the chemical and electroplating industrie.

Many years of experience and in depth specialist knowledge, combined with professional planning and execution, guarantee successful projects of highest technical standards.

- batch decontamination and neutralization plants
- ion exchanger systems
- mixing and reaction tanks
- electroplating process tanks with and without goods movement
- one or two row galvanizing lines
- dosing facilities for chemical processes
- electrotechnical control, measuring and regulation technology
- sedimentation plants with sludge thickening and filterpresses

Container construction:

- rectangular tanks
- round tanks
- sedimentation tanks
- pickling tanks
- acid/alkaline storage and dosing tanks
- electroplating tanks
- drip pans for acid and alkaline
- inliner

Customized tanks in every size are our strength. According to your wishes and requirements, we manufacture plastic tanks in all shapes and sizes, factory made or welded on site.

Pipeline construction for:

- exhaust systems
- drinking water systems
- waste water systems
- chemicals
- di- water systems
- dosing systems

For the manufacturing and assembly of pipeline systems to convey aggressive liquids and water, we are your competent and reliable partner. Single and double pipesystems are made with our trained and long term employees in all plasticwelding processes.

Electroplating line

Ventilation components

Picling bascet

Sedimentation tank with filterpress

Ion exchanger

Container installations

Turned and milled parts

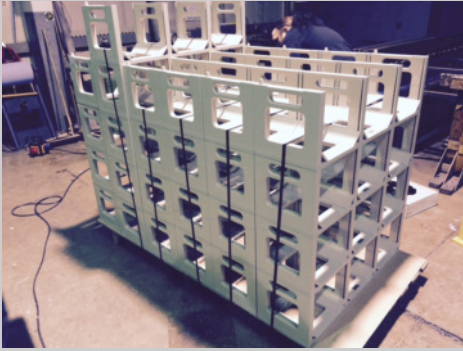

Electroplating tank with goods movement

Special construction

Milled parts

Round Tanks

Pipeline construction above ground

Pickle tank

Tank extensions

Storage Tank for sulfuric acid in PVDF

Drinking water Tank

Acid tank with circulation pump

Pipeline construction underground

Exhaust gas scrubber

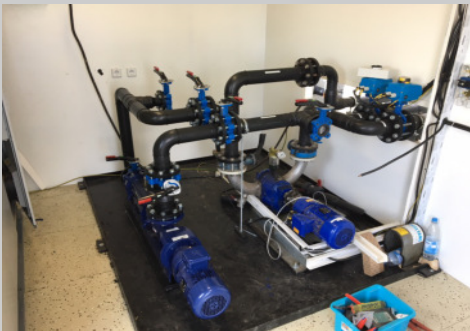

Zinc piecing station

Dosing cabinet

Pump system

Hot gas welding

Exhaust air and water pipes

IR welding

Extrusion welding

Electrofusion of PE pipes
